I'm a person with the ideal interest in learning and gaining experience within my film making career. Currently residing in OC, I've recently transferred to a Calstate in regards to continue my pursue in film. I'm a video editor and videographer at heart with experience of shooting in hand held raw footage, but my hardships have given me the experience in other fieldworks such as photo editing, website design, including drone work. My best regards to whoever takes my application into mind. Thank you.
